

Installing the F5 Access VPN App on Mobile Devices

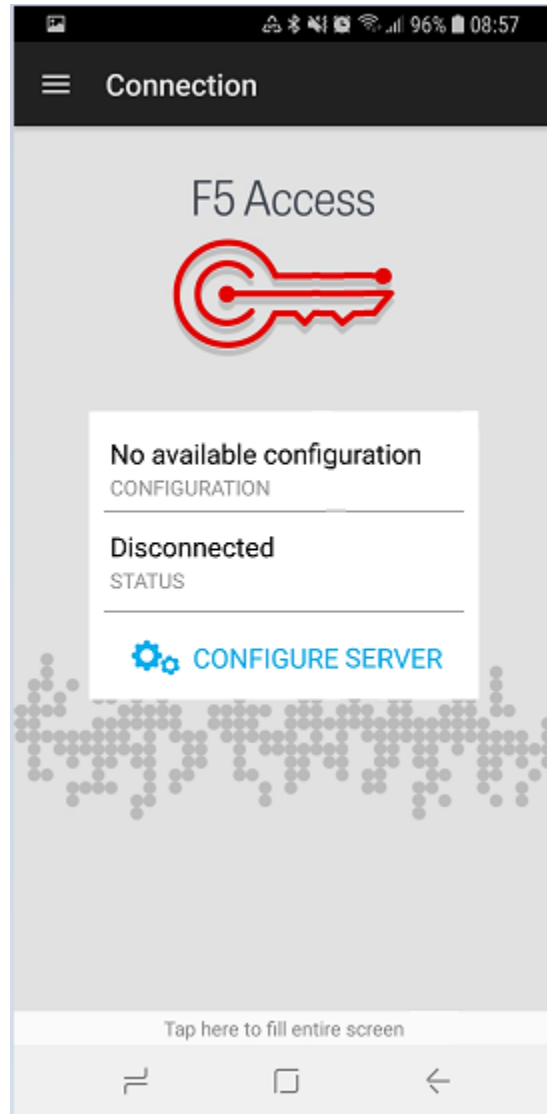

Visit the Play/Apple store and search for the app F5 Access and install the app. Accept any permissions requirements that come up during the installation

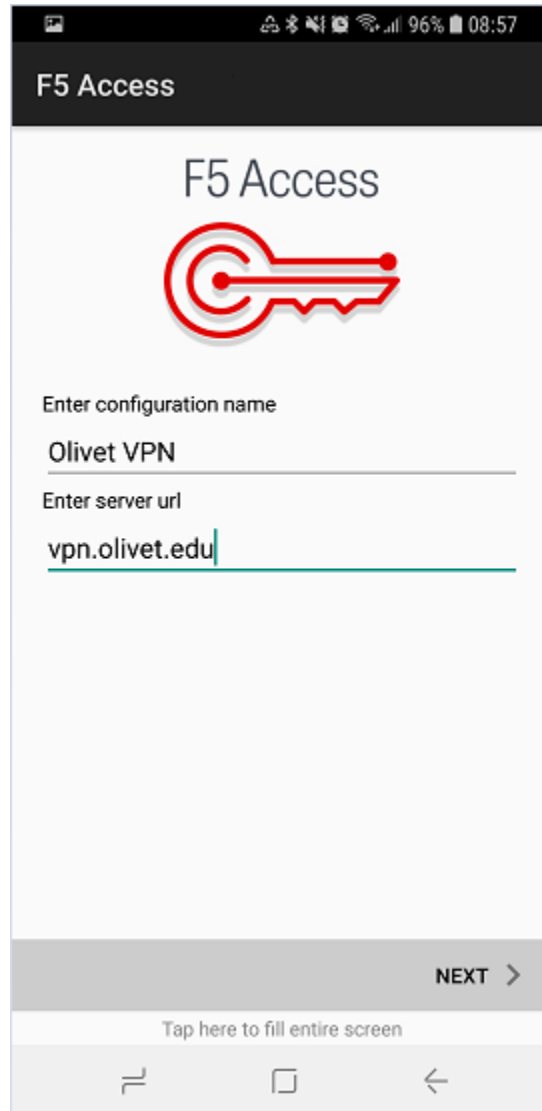

Once the installation is complete, open the app

On the first screen, press the configure server icon

In the enter configuration name field enter the name for the connection. This can be anything you like. In this case we used "Olivet VPN". In the enter server URL field, enter "vpn.olivet.edu". Press next.

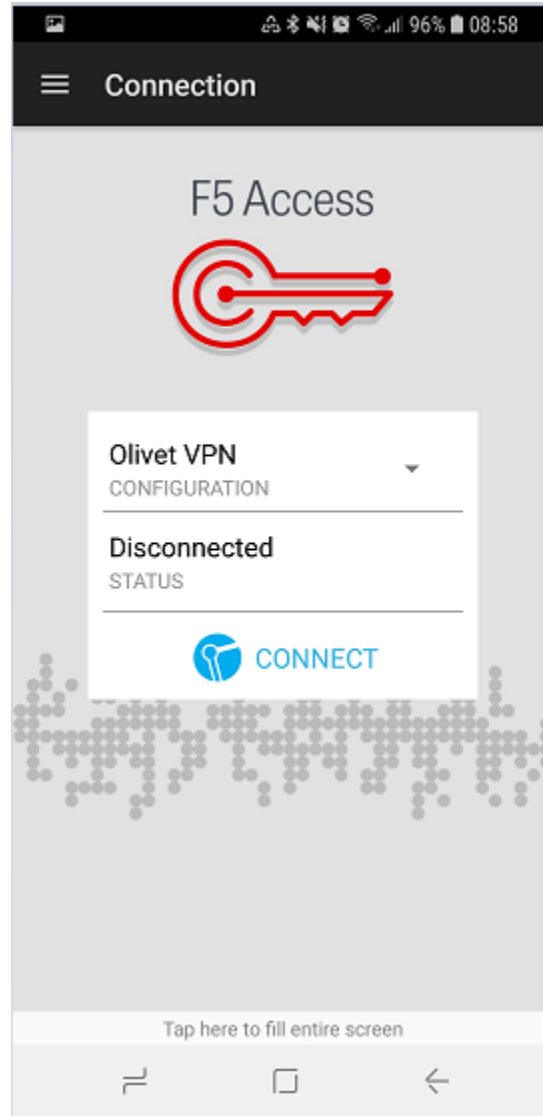

The screenshot shows the F5 Access mobile application interface. At the top, the status bar displays various icons and the time 08:57 with 96% battery. Below the status bar is a black header with the text "F5 Access". The main content area has a white background with the "F5 Access" logo, which consists of the text "F5 Access" above a red key icon. Below the logo, there are two input fields. The first is labeled "Enter configuration name" and contains the text "Olivet VPN". The second is labeled "Enter server url" and contains the text "vpn.olivet.edu". At the bottom of the screen, there is a grey bar with the text "NEXT >". Below this bar is a white bar with the text "Tap here to fill entire screen". At the very bottom, there is a grey bar with three navigation icons: a home icon, a square icon, and a back arrow icon.

In the username field, enter your olivet username without the "@olivet.edu". When complete, press the checkmark in the top right corner to go back to the connection page.

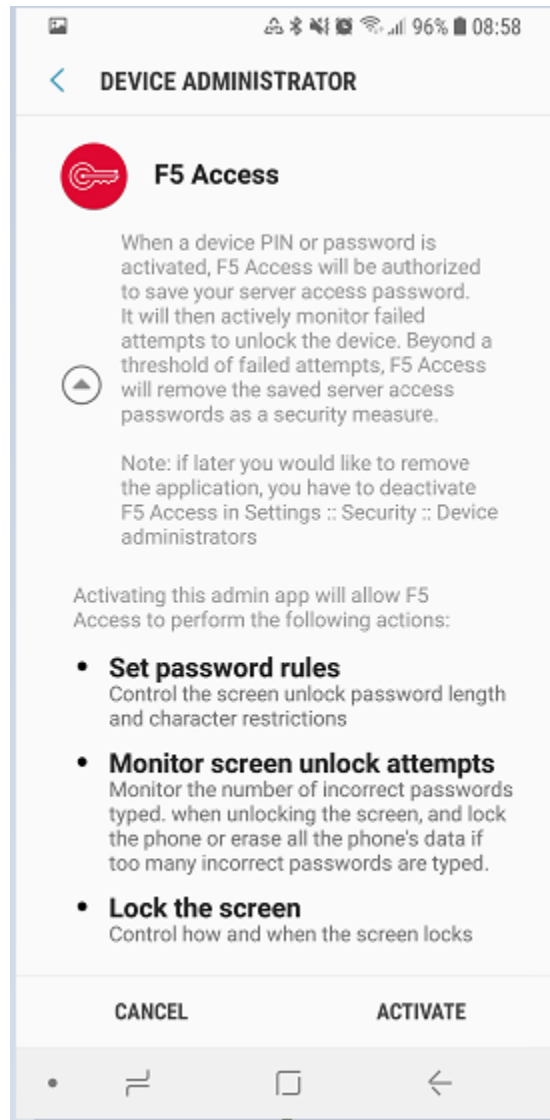

The screenshot shows a mobile application interface for adding a VPN configuration. The title bar at the top is black with white text that reads "Settings: Add Configuration" and a white checkmark icon on the right. Below the title bar, the screen is divided into several sections, each with a title and a value or a checkbox. The sections are: "Name" with the value "Olivet VPN"; "Server" with the value "https://vpn.olivet.edu"; "Web Logon" with the value "Use Web logon for authentication" and an unchecked checkbox; "Username" with the value "dmeister"; "Password" with the value "Disabled by administrator"; "FIPS Mode" with the value "Enable FIPS mode" and an unchecked checkbox; and "Client certificate" which is currently empty. At the bottom of the screen, there is a light gray bar with the text "Tap here to fill entire screen" centered. Below this bar is the standard Android navigation bar with three icons: a square, a circle, and a triangle.

| Field | Value | Checkbox |
|--------------------|----------------------------------|--------------------------|
| Name | Olivet VPN | |
| Server | https://vpn.olivet.edu | |
| Web Logon | Use Web logon for authentication | <input type="checkbox"/> |
| Username | dmeister | |
| Password | Disabled by administrator | |
| FIPS Mode | Enable FIPS mode | <input type="checkbox"/> |
| Client certificate | | |

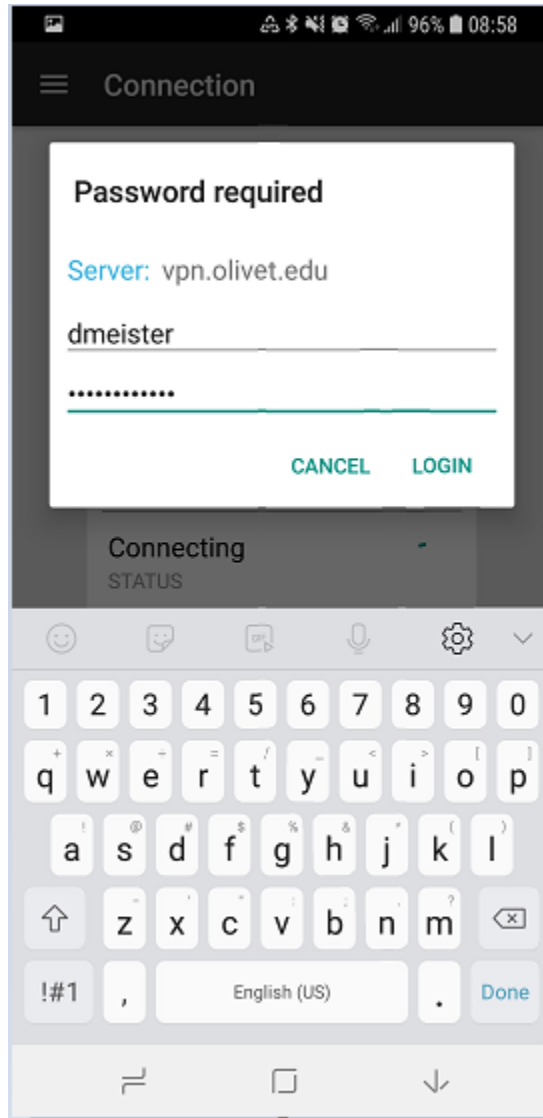

Press the connect icon

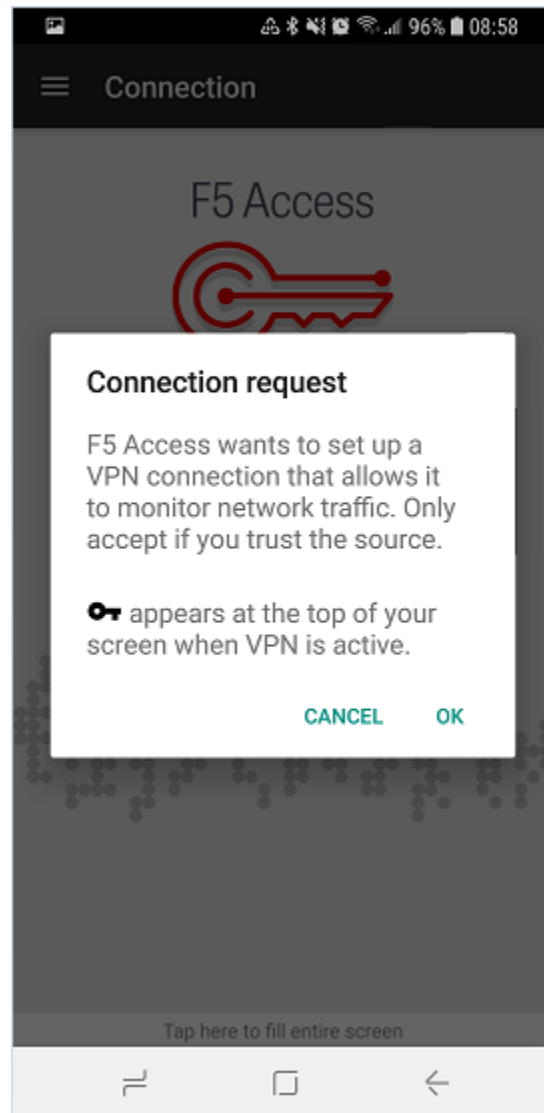

Press the activate button

Enter your password and press login

Press OK.

Once you are connected, you will see the status change to Connected and start a timer. You can minimize the app and you will still be connected to the ONU network. To close the connection, open the app back up and you can press the disconnect icon.
